AfroCoils - quick test sheet

Version 0.2.0. Try each thing on the left. If what happens does not match the right-hand column, note the number and tell the team what you saw.

	What we are testing	Expected result
1	Open the app with Wi-Fi and data turned off.	Everything loads: pictures, text and icons. Nothing is blank.
2	Tap Get Started on the first screen.	The page scrolls down to two choices: Quick Hairstyle and Hair Care.
3	Tap Quick Hairstyle and pick each time option.	Only styles that fit that time show, quickest first.
4	Tap each icon in the bottom bar.	Four tabs: SOS, Styles, Growth, Profile. Each opens its page.
5	Open the menu (top left).	Hair SOS, Hair Styles, Hair Care, Hair Growth, Locs World, My Hair Profile, then About, Privacy and Contact at the bottom.
6	Press the phone's Back button a few times.	It goes back one page each time.
7	Fill in My Hair Profile, close the app fully and reopen it.	Everything you entered is still there.
8	Take the hair quiz from My Hair Profile.	Your answers appear on your profile.
9	Set your hair type to Locs, then look at Styles.	No loose-hair styles show, and the page explains why.
10	Open a hairstyle and switch between Front, Back and Side.	Each view shows a picture or a neat empty frame, plus the steps.
11	Open Hair Care and tap each card.	Each card opens its own page.
12	In Hair Care, open Something is wrong and choose 'hair loss'.	A clear warning to see a professional is shown.
13	Add a length check on Growth, then switch inches/cm and back.	The number converts and comes back exactly the same.
14	Log a wash day in the Calendar.	It shows on today's date and the next one is worked out for you.
15	Open Locs World and its lookbook.	A dark page with numbered loc styles and Front / Back / Side views.
16	Tap the Ask button (bottom right) and type a hair question.	A written answer with a button to the right page.
17	Ask something unrelated, like 'what's the weather?'	A short, polite line steering you back to hair.
18	Ask a question with Wi-Fi and data off.	You still get an answer.
19	Tap a lock icon and choose Unlock Plus.	A Test mode note shows, it unlocks for free, and the locks disappear.
20	Share a style from Styles with the internet off.	The app says it is saved on your phone and waiting to send. It does not say it was sent.
21	Make the phone's text size as large as possible.	Text still fits and nothing overlaps.
22	Open About, Privacy, Terms and Contact.	Each page opens and reads properly.
