Build source (Play / direct APK)	
Network conditions used	

How to use this document

Run each case on a real Android phone with the APK under test unless the case says otherwise. Mark the Result column **P** (pass), **F** (fail), **B** (blocked) or **N/A**, and record a defect number in Notes for every F.

Fresh install means uninstall the app first (which clears its profile). **Plus not unlocked** means a fresh install or a profile that has not used the unlock sheet; billing is in test mode, so unlocking costs nothing and cannot be undone except by reinstalling.

Network cases need a traffic proxy on the phone (e.g. mitmproxy or HTTP Toolkit with its CA installed). Server cases (API) are run with curl or a script against the production function URL; do not leave test rows in the queue - delete them after the run.

Priority: High - must pass to release. Med - fix before the next release. Low - cosmetic or rare.

SOS - Launch and Hair SOS (front page)

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-SOS-01	**Cold launch with no signal**	Fresh install. Airplane mode on.	1. Launch the app 2. Scroll the whole front page	Front page renders fully: collage of three photos, title, one line, Get Started. Fonts, icons and images all load; nothing is blank or broken.	High		
TC-SOS-02	**Get Started scrolls, not navigates**	App open on front page.	1. Tap Get Started	Page scrolls down to the doors. Address stays the same; no new screen opens.	High		
TC-SOS-03	**Exactly two doors**	Front page.	1. Scroll to the doors 2. Tap Quick Hairstyle, go back 3. Tap Hair Care	Only two doors: Quick Hairstyle opens /sos/quick; Hair Care opens /care. No Hair Problem door on this page.	High		
TC-SOS-04	**One screen at three addresses**	App open.	1. Open #/ , #/home and #/sos in turn	Same screen at each address, no redirect. SOS tab and drawer Hair SOS entry are selected on all three; the page title is identical.	Med		
TC-SOS-05	**Locs World pointer for loc wearers only**	Profile hair type set to Loose Natural.	1. Open front page 2. Change hair type to Locs in My Hair Profile 3. Return to front page	No Locs World card with Loose Natural. Card pointing to /locs appears once hair type is Locs.	High		
TC-SOS-06	**SOS tab stays lit inside its children**	Front page.	1. Open Quick Hairstyle	SOS tab remains the selected tab on /sos/quick.	Low		
TC-SOS-07	**Collage is decoration**	TalkBack on.	1. Swipe through the front page	Collage photos are not announced and are not links; the first focusable target is Get Started.	Low		
TC-SOS-08	**Quick Hairstyle time bands**	Loose Natural profile.	1. Open Quick Hairstyle 2. Select each band in turn	Bands are 5-10 min, 15-20 min, 20-45 min. Each shows only styles inside its time, ranked against the profile, shortest first.	High		
TC-SOS-09	**Quick Hairstyle for a loc wearer**	Profile hair type Locs.	1. Open Quick Hairstyle	Empty shelf with a plain message that the library is loose-hair so far. It does not blame the profile and shows no loose-hair styles.	High		

NAV - Navigation and structure

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-NAV-01	**Bottom bar has four tabs**	Any screen.	1. Inspect the tab bar 2. Tap each tab	Tabs are SOS, Styles, Growth, Profile in that order. Only the current tab (orange pill) shows its label; the others are icons with an accessible label.	High		

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-NAV-02	**Drawer order and contents**	Any screen.	1. Open the menu	Entries in order: Hair SOS, Hair Styles, Hair Care, Hair Growth, Locs World, My Hair Profile. No Home entry. About, FAQ, Docs, Privacy, Terms, Contact sit at the base.	High		
TC-NAV-03	**Old addresses resolve**	App open.	1. Open #/sos/care 2. Open #/community 3. Open #/welcome	/sos/care lands on /care; /community lands on /about; /welcome lands on the front page.	Med		
TC-NAV-04	**Unknown address**	App open.	1. Open #/no-such-page	Not-found screen with a way back; app does not crash.	Low		
TC-NAV-05	**Android back button**	Navigate Front page > Styles > a style.	1. Press system Back repeatedly	Each press returns one screen; from the front page Back leaves the app.	Med		
TC-NAV-06	**Hash routing survives reload**	Any inner screen, e.g. /growth.	1. Reload the WebView (or background the app until it is killed and reopen)	No 404 or blank page; app opens normally.	Med		
TC-NAV-07	**Distinct page titles**	Web build in a browser.	1. Visit each section, a guide and a style	Browser tab title changes per route; a guide and a style show their own name.	Low		
TC-NAV-08	**Breadcrumbs on child screens**	App open.	1. Open /calendar, /products and /styles/submit	Each shows a section crumb naming its parent and the crumb navigates there.	Low		

TOUR - Welcome tour and Docs

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-TOUR-01	**Tour offered once**	Fresh install.	1. Launch 2. Decline the tour 3. Kill and relaunch the app	Tour is offered on the front page on first launch only; after declining it is not offered again.	Med		
TC-TOUR-02	**Tour runs to the end**	Fresh install.	1. Accept the tour 2. Step through every step	11 steps from Welcome to AfroCoils to That is the app. Each spotlights its element or falls back to a centred card; finishing closes the overlay.	Med		
TC-TOUR-03	**Replay from Docs**	Tour already seen.	1. Open Docs from the drawer 2. Tap replay tour	Tour starts again from step 1.	Low		
TC-TOUR-04	**Docs match the app**	Docs open.	1. Read each section and compare with the screens	Section names, doors, tabs and lists (time bands, occasions, climates) match what the app shows.	Low		

PRO - My Hair Profile and hair quiz

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-PRO-01	**Hair type persists**	Fresh install.	1. Set hair type to Locs on My Hair Profile 2. Kill and relaunch	Hair type is still Locs; screens that branch on it reflect it.	High		
TC-PRO-02	**Hair quiz writes the profile**	Profile empty.	1. Open the quiz from My Hair Profile 2. Answer every question 3. Return to the profile	Answers appear in the profile pickers; completeness meter shows complete.	High		
TC-PRO-03	**Quiz and meter agree**	Profile partly filled by pickers.	1. Open the quiz	The quiz asks only for fields the meter counts as missing or offers to change them; meter and quiz agree on 'done'.	Med		
TC-PRO-04	**Climate is a picker**	Profile open.	1. Open the climate field	Exactly four options: Humid / tropical, Dry / arid, Cold / low humidity, Temperate. No free text.	Low		
TC-PRO-05	**Profile photo**	Camera and gallery permissions not yet granted.	1. Add a profile photo from the camera 2. Replace it from the gallery	Android asks for permission; photo shows; replacing works; denying permission shows a calm message, no crash.	Med		
TC-PRO-06	**Loc stage from install date**	Hair type Locs.	1. Enter a loc install date 2 months ago 2. Change it to 3 years ago	Loc stage updates from the date (e.g. starter, then mature); it is never typed in.	Med		
TC-PRO-07	**Data survives an update**	Profile filled on the previous release.	1. Install the new APK over the old one (or apply a pushed update)	All profile data, length checks, calendar history and photos are intact.	High		

FORK - Hair type fork

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-FORK-01	**Loc wearer never sees loose technique**	Hair type Locs.	1. Browse Styles, Recommended, Quick Hairstyle, Quick Hair Check	No loose-hair style appears. Styles says plainly the library is loose-hair so far. The 'My curls are...' group, tangling and breakage are absent from the Quick Hair Check.	High		
TC-FORK-02	**Loose wearer sees loose content**	Hair type Loose Natural.	1. Browse the same screens	Styles and the full Quick Hair Check are shown.	High		
TC-FORK-03	**Calendar default follows hair type**	New calendar, switch hair type between runs.	1. Open the calendar as Loose Natural, then as Locs	Default schedule differs (e.g. retwist cadence for locs).	Med		

STY - Hair Styles

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-STY-01	**Browse by category and occasion**	Loose Natural.	1. Open Styles 2. Filter by each category 3. Filter by each occasion	Occasions are Casual Day, Work/Professional, Formal Event, Gym/Active. Filters narrow the list; clearing restores it.	High		
TC-STY-02	**Style detail gallery**	Styles open.	1. Open a style 2. Switch Front, Back, Side	Each angle shows its photo, or a placeholder of the same size when missing. Steps are listed.	High		
TC-STY-03	**Recommended states its criteria**	Profile filled.	1. Tap the Recommended button on Styles	Criteria listed: hair type (excludes), length band from the last length check (ranks only), care preferences. Porosity, density and curl pattern are named as not ranking.	Med		
TC-STY-04	**Clashing styles are dropped**	Set a care preference a style clashes with.	1. Open Recommended	The clashing style is absent, not greyed out.	High		
TC-STY-05	**Length ranks, never excludes**	Log a short length check.	1. Compare Recommended before and after	Order may change; no style disappears because of length.	Med		
TC-STY-06	**Free shows two recommendations**	Plus not unlocked.	1. Open Recommended	First 2 styles shown in full; the rest are visible as locked previews that open the Plus sheet.	Med		
TC-STY-07	**Generated-picture disclosure**	Styles open.	1. Read Styles, About and FAQ	Each says the style pictures are generated and that nothing you read is generated.	Low		

SUB - Contribute a style

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-SUB-01	**Submit button guarded**	Open /styles/submit.	1. Leave name empty 2. Enter name, no description 3. Add description, rights unticked 4. Tick rights	Submit stays disabled until name (2+ chars), description and the rights tick are all present.	High		
TC-SUB-02	**Photo limit**	Submit form.	1. Add photos from camera and gallery until no more are allowed	At most 4 photos; the add control stops at 4.	Med		
TC-SUB-03	**Offline submit is queued honestly**	Airplane mode on.	1. Fill the form and submit	Screen says the style is queued on this phone; no success tick. Row shows status Queued with a retry option.	High		
TC-SUB-04	**Online submit becomes Sent**	Online. A Queued row exists.	1. Retry the queued row	Row changes to Sent. Retrying again does not create a second submission (same id returned).	High		
TC-SUB-05	**Server error leaves row Queued**	Simulate 413/429/500 (proxy or oversized photo).	1. Submit	Error message shown; row stays Queued.	Med		

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-SUB-06	**Prefill from lookbook placeholder**	Hair type Locs. Lookbook open.	1. Tap a plate with no picture	Form opens with the style name shown (not asked) and hair type Locs.	Med		
TC-SUB-07	**Prefill from My Styles**	A worn style exists on Growth.	1. Tap Share with the community on it	Form is seeded from that style (?from=).	Low		
TC-SUB-08	**Withdraw deletes photos**	A queued submission with photos.	1. Withdraw it 2. Inspect app storage	Row removed and its photo files deleted.	Med		

CARE - Hair Care, guides, Quick Hair Check, products

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-CARE-01	**Hub cards**	Hair Care open.	1. Tap each card	Cards include Hair routine (/calendar), Product recommendations (/products), Hairstyle recommendations (/styles/recommended) and Something is wrong (/sos/problem).	High		
TC-CARE-02	**Know-your-hair cards read the profile**	Profile filled.	1. Look at the know-your-hair cards	Each shows the profile value and links to where it is set; there are no pickers on Hair Care.	Med		
TC-CARE-03	**Porosity test**	Hair Care open.	1. Run the porosity test to the end	A result is shown and saved to the profile.	Med		
TC-CARE-04	**Quick Hair Check cautions**	Loose Natural.	1. Open hair loss, bald patches, receding hairline, scalp bumps	Each shows its caution in full. Three of them show no ingredient list. Nothing claims to diagnose.	High		
TC-CARE-05	**Quick Hair Check count**	Loose Natural.	1. Count concerns	24 concerns phrased as symptoms ('my hair is...').	Low		
TC-CARE-06	**Products name brands, no images**	Products open.	1. Browse the shelf	Brand names appear here; no packaging photos anywhere.	Low		
TC-CARE-07	**Deep links open a section**	App open.	1. Open #/faq?open=<id> and a Products ?open= link	Screen opens scrolled to and expanded on that section.	Low		

CAL - Calendar and reminders

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-CAL-01	**Next due is derived**	Calendar open.	1. Log a wash day today	Next due date equals today plus the cadence; changing the cadence moves it.	High		
TC-CAL-02	**Dates in local time**	Device time zone America/New_York, time 21:00.	1. Log an event for today	Event lands on today's date, not tomorrow or yesterday.	High		
TC-CAL-03	**Reminders are Plus**	Plus not unlocked.	1. Turn on a reminder	Plus sheet opens with the reminders reason; reminder stays off.	Med		
TC-CAL-04	**Reminder fires**	Plus unlocked.	1. Turn on a reminder 2. Grant notification permission 3. Wait for or fake the due time	Android asks for permission; one notification at the next occurrence (may be inexact). Changing the schedule reschedules it.	Med		

GRO - Hair Growth

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-GRO-01	**Log a length check**	Growth open.	1. Add a length check in inches	Entry appears in the history with today's date.	High		
TC-GRO-02	**Unit is display only**	Two checks logged.	1. Switch to cm 2. Switch back to inches	Values convert for display and return to exactly the original inches.	High		
TC-GRO-03	**Milestones**	Latest check 10 in.	1. Look at milestones	Neck length (8 in) reached; next is Shoulder length (12 in); later Armpit 16, Bra-strap 20, Mid-back 24, Waist 30.	Med		
TC-GRO-04	**Plus offered once at second check**	Plus not unlocked, one check logged.	1. Log a second check 2. Close the sheet 3. Log a third check	Sheet offered after the second check only, and not again this launch.	Med		
TC-GRO-05	**Own data never locked**	Plus not unlocked.	1. Open Growth	Every length check is readable; only the analysis (retention, ETAs) is locked.	High		
TC-GRO-06	**Log a trim**	Growth open.	1. Log a trim	Trim appears in history and retention accounts for it.	Low		
TC-GRO-07	**Delete a worn style**	A worn style with photos.	1. Delete it 2. Inspect storage	Style and its photo files are gone.	Med		

LOC - Locs World

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-LOC-01	**Own look**	Open /locs.	1. View the screen	Espresso masthead with cream type and drawn strands, in the brand colours.	Low		
TC-LOC-02	**Loose or Loc'd? sets hair type**	Hair type Loose Natural.	1. Choose Loc'd on the opening	Profile hair type becomes Locs.	Med		
TC-LOC-03	**Free and locked chapters**	Plus not unlocked.	1. Open every chapter	Basics, Starting, Scalp, Problems and Professional read in full. Others show title, first lines and a lock.	High		
TC-LOC-04	**Outline sections**	Locs World open.	1. Open an outline section	Topics drawn as grey chips with a line saying it is not written yet; nothing reads as advice.	Med		
TC-LOC-05	**Avoid lists**	Locs World open.	1. Find a things-to-avoid block	Items drawn with a struck marker, not a tick.	Low		
TC-LOC-06	**Lookbook**	Open /locs/styles.	1. Scroll the plates 2. Switch Front, Back, Side	18 numbered plates. Starting locs group free in full; others show front picture and description with a lock. Missing angles are placeholders.	Med		
TC-LOC-07	**Lookbook deep link**	App open.	1. Open #/locs/styles?open=<style id>	Opens on that plate.	Low		

ASK - Ask

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-ASK-01	**Opens two ways**	Any screen.	1. Tap the Ask button bottom right 2. Open #/ask	Sheet opens on every screen; /ask is full screen. Neither is in the drawer or tab bar. Nothing is labelled AI.	High		
TC-ASK-02	**Written answer**	Online or offline.	1. Ask 'how do I stop breakage'	Written answer with steps, a caution where relevant, a button to the screen where it is done, and the community block.	High		
TC-ASK-03	**Red-flag question**	Any.	1. Ask 'I have a bald patch'	Reply leads with the dermatologist line.	High		
TC-ASK-04	**Off-topic question**	Any.	1. Ask 'what is the weather'	One calm line back to hair (not understood).	Med		
TC-ASK-05	**Unanswered hair question**	Any.	1. Ask an obscure hair question	Says nothing was found without guessing and offers the doors.	Med		
TC-ASK-06	**Locs question for locs**	Hair type Loose Natural.	1. Ask 'how often should I retwist my locs'	Answered for locs; if a match was filtered out the screen says so rather than substituting.	Med		
TC-ASK-07	**Locked chapter in Ask**	Plus not unlocked.	1. Ask about a Plus-only loc chapter	Result shows title and first line with a lock, not the full passage.	Low		

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-ASK-08	**Length cap**	Ask open.	1. Type more than 160 characters	Input stops at 160.	Low		
TC-ASK-09	**Works with no signal**	Airplane mode.	1. Ask a question	Answer appears normally; no error about the network.	High		
TC-ASK-10	**Conversation not stored**	Sheet has a conversation.	1. Kill and relaunch	Sheet conversation is gone.	Low		

PLUS - AfroCoils Plus (billing in test mode)

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-PLUS-01	**Rescue is never locked**	Plus not unlocked.	1. Open Hair SOS, Quick Hairstyle, Hair Care, Quick Hair Check, Ask, Profile, Quiz	No lock or price on any of them.	High		
TC-PLUS-02	**Test-mode purchase**	Plus not unlocked.	1. Tap any lock 2. Read the sheet 3. Unlock	Sheet shows a Test mode banner saying payment is not set up yet. Unlock Plus succeeds without payment and every lock disappears.	High		
TC-PLUS-03	**Unlock persists**	Plus unlocked.	1. Kill and relaunch	Still unlocked.	Med		
TC-PLUS-04	**Restore in test mode**	Fresh install.	1. Tap Restore	Says 'Test mode: there's no store to restore from yet.'; nothing unlocks; no crash.	Low		

UPD - Updates

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-UPD-01	**Check sends nothing**	Traffic proxy on the phone.	1. Launch the app	One GET of latest.json from the releases bucket: no query string, no profile field, no identifier.	High		
TC-UPD-02	**Check throttled**	App launched once.	1. Background and return within 6 hours	No second request inside six hours.	Low		
TC-UPD-03	**New APK offered, not installed**	latest.json with a higher versionCode.	1. Launch 2. Tap Download	Prompt offers the APK; nothing downloads until tapped; Android asks to confirm install.	High		
TC-UPD-04	**Pushed update**	latest.json with a higher bundle code, minVersionCode met.	1. Tap Update now	Bundle downloads, SHA-256 verified, app reloads on the new bundle.	High		
TC-UPD-05	**Tampered bundle rejected**	Manifest SHA-256 does not match the zip.	1. Tap Update now	Update refused; app stays on the current bundle.	High		
TC-UPD-06	**Bad bundle rolls back**	Push a bundle that crashes before first render.	1. Apply it 2. Relaunch	App rolls back to the previous bundle.	Med		

PRIV - Privacy and network

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-PRIV-01	**Only three requests ever leave**	Traffic proxy. Use every screen for 10 minutes.	1. Review captured traffic	Only the update GET, Ask question POSTs (sharing on) and style submissions. No analytics, crash reporter, CDN font or Capgo host.	High		
TC-PRIV-02	**Ask sharing payload**	Sharing on. Proxy on.	1. Ask one question 2. Press back to replay it	One POST carrying only the words, outcome, matched record and bundle number. Nothing from the profile. No second POST on back.	High		
TC-PRIV-03	**Sharing switched off**	Turn sharing off on About.	1. Ask questions	No question request is sent. Disclosure under the Ask box still shows.	High		
TC-PRIV-04	**Legal pages offline**	Airplane mode.	1. Open Privacy, Terms, Contact, About, FAQ	All open from the bundle.	Med		

A11Y - Accessibility and layout

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-A11Y-01	**Screen reader labels**	TalkBack on.	1. Move through tab bar, drawer and doors	Every control is announced with a meaningful name.	Med		
TC-A11Y-02	**Large text**	Android font size largest.	1. Visit every section	No clipped or overlapping text; everything reachable.	Med		
TC-A11Y-03	**Small and large phones**	360 dp and 412 dp wide devices.	1. Visit every section	Layouts fit without horizontal scroll; tab labels fit.	Med		
TC-A11Y-04	**Contrast**	Any.	1. Check text on orange buttons	Text on orange is bold; headings are chocolate on cream, not orange.	Low		

API - Server routes (Supabase functions)

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-API-01	**Submission accepted as Pending**	Valid submission body.	1. POST to submissions	200 with an id; the row is stored as Pending, never published automatically.	High		
TC-API-02	**Duplicate client_id**	Same body sent twice.	1. POST twice	Both return the same id; one row, no orphaned photos.	High		
TC-API-03	**Bad photo refused**	A JPEG with script in metadata, a non-JPEG, a truncated file.	1. POST each	Rejected; nothing stored.	High		

ID	Title	Preconditions	Steps	Expected result	Pri.	Result	Notes
TC-API-04	**EXIF stripped**	JPEG with GPS EXIF.	1. POST 2. Download the stored photo through a signed URL	Stored photo has no EXIF/GPS.	High		
TC-API-05	**Oversized and invalid bodies**	Body over the byte ceiling; malformed JSON.	1. POST to each route	413 for too large; 400 for invalid.	Med		
TC-API-06	**Rate limit**	Script repeated requests.	1. POST past the limit	429 once over the limit.	Med		
TC-API-07	**Question recorded**	Valid question body.	1. POST to questions	204 with no body.	Med		
TC-API-08	**Photo bucket private**	A stored photo path.	1. Request it without a signed URL	Access denied.	High
